CO5 - AT1 - LEVEL-3

Level Exam C 02 Sep 2026, 02:45 PM

← Back

Result Available
Your score: 74 / 100**QUESTIONS**
LEVEL 3 — HARD
Q1
Function
Q2
Functions and pointers
2 / 2 saved**Level 3 — Hard Interest (H)** — functionWrite a function double simpleInterest(double principal, double rate, double time) that calculates the simple interest for given principal, rate of interest, and time period.
Sample Input:
Enter principal amount: 1000
Enter annual interest rate (in %): 5
Enter time (in years): 3
Sample Output:
Simple Interest is 150.00**Your Code**

```
#include <stdio.h>
2
3 double simpleInterest(double principal, double rate, double time) {
4     return (principal * rate * time) / 100;
5 }
6
7 int main() {
8     double principal, rate, time, interest;
9
10    printf("Enter principal amount: ");
11    scanf("%lf", &principal);
12
13    printf("Enter annual interest rate (in %): ");
14    scanf("%lf", &rate);
15
16    printf("Enter time (in years): ");
17    scanf("%lf", &time);
18
19    interest = simpleInterest(principal, rate, time);
20
21    printf("Simple Interest is %.2f\n", interest);
22
23    return 0;
24 }
```

Program Input (stdin)
Enter input if required...**Output**
Enter principal amount: Enter annual interest rate (in %): Enter time (in years): Simple Interest is 150.00

Result Available
Your score: 74 / 100**QUESTIONS**
LEVEL 3 — HARD
Q1
Function
Q2
Functions and pointers
2 / 2 saved**Level 3 — Hard UpperCase (H)** — functions and pointersWrite a function void toUpperCase(char *str) that converts all lowercase letters in a given string to uppercase using pointers.
Sample Input:
Enter a string: OpenAI
Sample Output:
Uppercase string is: OPENAI**Your Code**

```
#include <stdio.h>
2
3 void toUpperCase(char *str) {
4     while (*str) {
5         if (*str >= 'a' && *str <= 'z') {
6             *str = *str - 'a' + 'A';
7         }
8         str++;
9     }
10 }
11
12 int main() {
13     char str[100];
14
15     printf("Enter a string: ");
16     scanf("%99s", str);
17
18     toUpperCase(str);
19
20     printf("Uppercase string is: %s\n", str);
21
22     return 0;
23 }
```

Program Input (stdin)
Enter input if required...**Output**
Enter a string: Uppercase string is: OPENAI
